Luomo, the house moniker for experimental Finnish dub producer Sasu Ripatti, will never top 2000's *Vocalcity*, which blasted dance music far into the future. Like *Slanted and Enchanted* or *Is This It*, its timelessness cannot be reproduced. *Convival* is excellent in parts though, like cameos from Scissor Sister Jake Shears and the silky bounce of "Have You Ever" featuring vocals from Berlin's DJ Cassy. He may never top *Vocalcity*, but he better not stop trying.
