

NSI - Non Standard Institut

Cadenza

12" // £5.99

NSI. non standard institut release their first production together on Luciano's Cadenza records.

Scientists in sound come together in the analog world - huge Nord bassline swoops set off a grooving, lengthy jazzy workout - Moodymann goes latin, or perhaps Sun Ra as fully digital space lord. We've been

creaming ourselves about this twelve for a week or so now - its rumoured to be very limited and its certainly one of the finest things out of the Kompakt stable in ages. Max Loderbauer and Tobias Freund are two very experienced musicians: Max was germany's service guy for the fairlight sampler, toured europe, america and japan as Sun Electric with tom thiel from 1990 to 2000, and lately released 'chica and the folder' on Monika. Tobias Freund worked as a sound engineer for 18 years, is 'sieg über die sonne' together with martin schopf (dandy jack) and has released excellent projects such as pink elln's 'the electronic dreamplant'. Awesome 12" - buy!
